

Printing multiple images on one page for Mac OS

This guide explains how to print multiple JPEG images on one page when using a Mac Operating System.

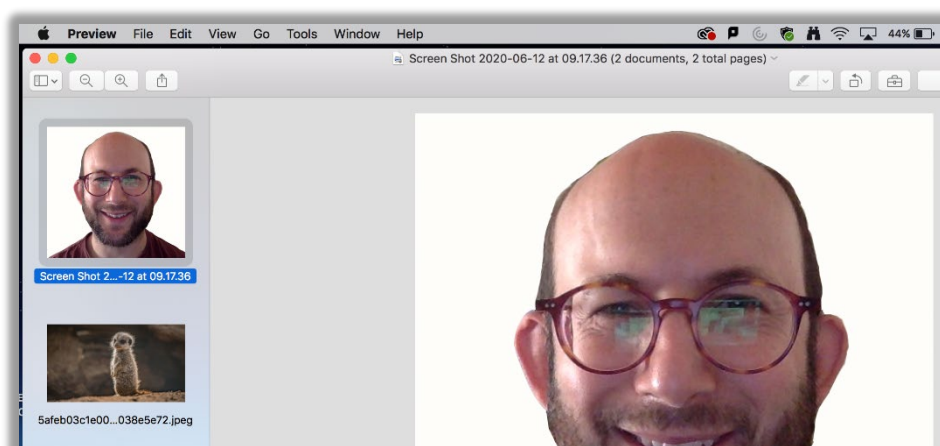

1. Select all the images you wish to print by either dragging the mouse or holding the shift key. It may help to put all your images in one folder first.

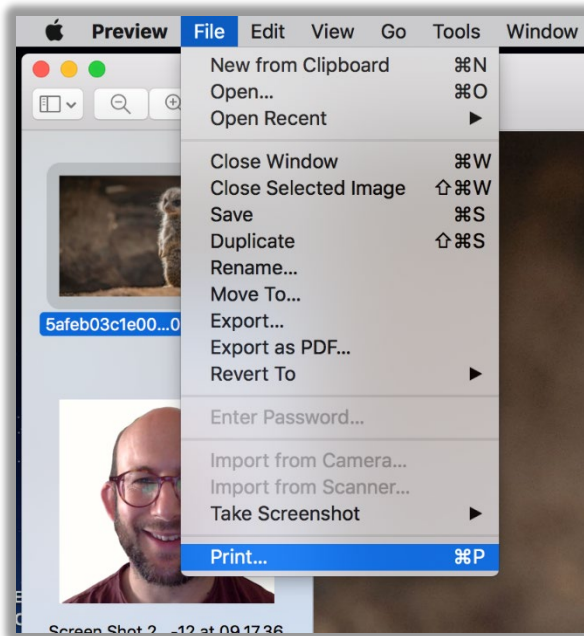

2. Hold the CTRL key and select any of the selected images.
3. A pop-up will appear. Select **Open With > Preview**

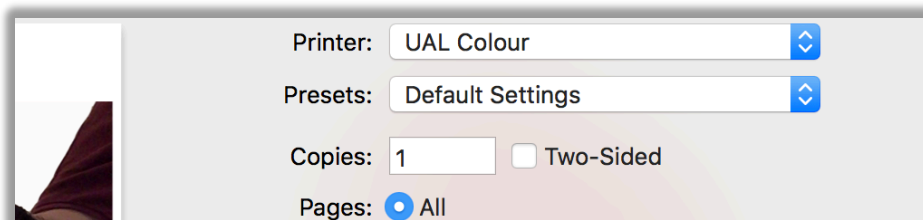

4. Your images will open in Preview

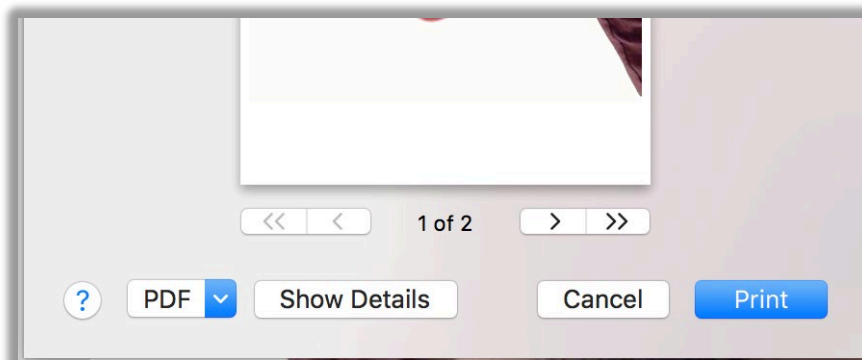

5. From the Preview menu, select **File > Print**

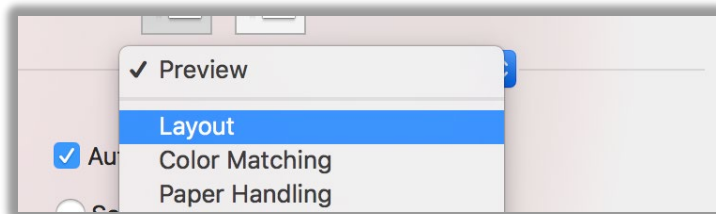

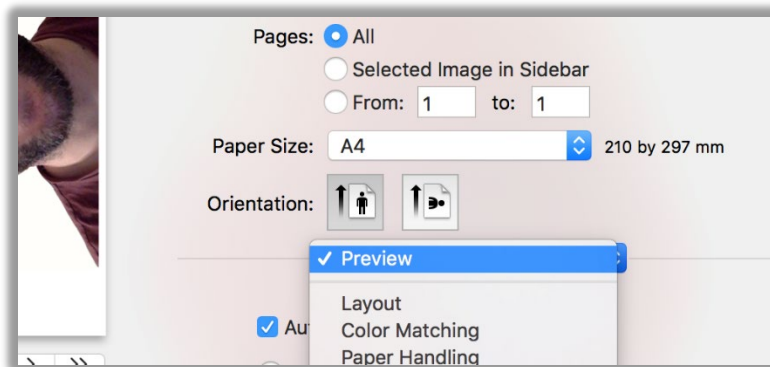

6. Select the correct printer

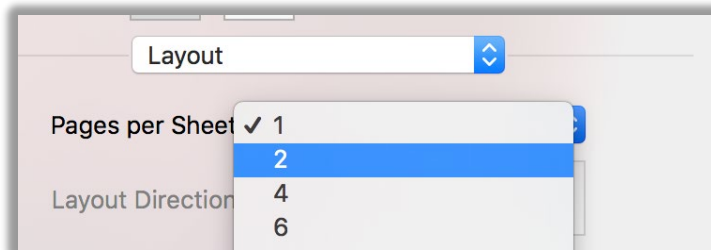

7. Select Show Details

8. Select **Preview > Layout**

9. In **Pages per Sheet**, select the number of images per page you want

10. The Preview screen will show you how your images will appear for printing
11. Select **Print** to finish
