

Connect to UAL-WiFi (Android)

To connect to UAL-WiFi on an Android, follow these steps:

01. Go to **Settings**.
02. Tap **Wi-Fi** to bring up a list of wireless networks.
03. Tap **UAL-WiFi** to connect.
04. Scroll up to **EAP method** and select **PEAP**. Phase 2 authentication is **MSCHAVPV2**.
05. Scroll down to **Identity**. Enter your **UAL username** (e.g. jbloggs, blo10123456 or sc_joblo) and **password**.
06. Click CONNECT.

For Android 7, you may see additional fields:

- CA Certificate: to **Use system certificates**
- Domain: enter **arts.ac.uk**
- Anonymous identity: **leave blank**

Having trouble connecting?

If you're having trouble connecting, please make sure you:

- are in an area with good wireless coverage
- are not using a temporary password

[Reset your password.](#)

If you have used UAL-WiFi on your device before, go to network settings and forget UAL-WiFi before connecting with a new password.
