London College of Communication is for the curious, the brave and the committed: those who want to transform themselves and the world around them.

### Postgraduate courses 2021/22

**Design**

- **MA Advertising**
  - Advertising is about the future of the advertising industry. With new technologies transforming advertising, you will learn how to develop strategic, creative and critical thinking, and without and with tackling changing the trends, the industry needs refining. On this course, you will develop the skills, ideas and solutions needed to shape and define the future of advertising.

- **MA Arts and Lifestyle Journalism**
  - This course will equip you with the advanced skills needed for a successful and sustainable career. Guided by tutors with professional, multi-platform experience gained at national print and online newspapers, the BBC, Sky TV and beyond, you will develop key practical journalistic skills and how to apply them to your particular area of interest. The course encourages a rigorous journalistic approach, with a focus on ethical, international and professional standards.

- **MA Data Journalism**
  - The course is driven by the intelligent interrogation of data and its presentation through digital means. You will learn how to create data-driven stories through the intersection of data, design, science and technology, and learn to present data in an engaging and persuasive way. You will learn how to develop and write treatment proposals, how to respond to briefs, and how to structure your work in order to effectively communicate your results.

- **MA Design for Social Innovation and Sustainable Futures**
  - This course will enable you to develop your creative skills in the context of global challenges of the 21st century. You will think critically, working collaboratively and creatively. The course explores the future design practice in an interdisciplinary, humanitarian and ecocentric way. With an emphasis on innovation, the participation design and real world change, this both a theoretical and practice course. Growing demand across public, private and non-profit section foregrounds the need for skills and competencies for creative practitioners who understand design within a business, social and personal perspective.

- **MA Design Management**
  - Design Management combines academic study, with creative and practical experience in a project-based curriculum that draws on a range of interdisciplinary perspectives from business to the arts. The course places a strong emphasis on the development of leadership, management, communication and analytical skills. Typical entry requirements include written and portfolio as part of your application.

- **MA Experimental Media and Visual Media**
  - Explore the creative and conceptual possibilities of images and alterable forms of engagement in visual culture. The experimental media and visual media pathway is an opportunity to develop your creative and critical skills, explore personal areas of interest and build a more diverse portfolio that will prepare you for a career in games, interaction and design professions.

- **MA Graphic Media Design**
  - The MA Graphic Media Design is a cultural and critical practice that echoes the cross-media nature of the design, communication and culture professions.

- **MA Illustration and Visual Media**
  - Explore the creation and contextualization of images as an integral part of engagement in visual culture. This MA is experimental and practices-based which will help you position yourself as a creative media producer. The course is designed to develop your knowledge and skills in all areas of visual media such as digital prints, painting, creative coding, print, photography, performance and animation. Graduates have worked on a range of media projects for clients such as Adobe, Allianz, Adobe, etc., as well as progressing to PhD level.

- **MA Interaction Design and Communication**
  - The MA Interaction Design and Communication course is designed to prepare you for work in an increasingly technology-driven and inter-disciplinary world. Throughout your studies, you will learn how to think critically and create innovative and engaging digital experiences. The course will equip you with the skills to engage with contemporary issues around topics such as new technologies, social and political concerns and the ethical and moral implications of digital media.
