

## UAL Carbon Reduction

University of the Arts London is committed to reducing our carbon emissions. We achieved our first milestone target of reducing emissions from utilities by 22% by July 2016 – we reduced it by 25%! We also achieved our next target of a 43% reduction by July 2020! As of July 2020 we have reduced it by 51%. The increase in 2017/18 is due to the new buildings at Camberwell and a very cold winter followed by a very hot summer.
