Electricity Consumption

Please note that due to when the data is received the latest data available is two months behind the current month. Consumption in 2020-21 was unusually low due to the Covid-19 pandemic.

UAL

UAL's electricity consumption from April 21 to March 22 is 32.1% more than the same time period in 2020-21. This is due to unusually low consumption in 2020-21 due to the pandemic.
30.1% increase on the previous year

Kings Cross is the highest electricity consuming site – it consumes approximately the same amount of electricity as all the other sites put together.
