

Privacy Notice – Cohort 2021 Cross UAL graduate offer

For one year, UAL will continue to process some of the information you provided or that was created about you as a student in order to provide ongoing support and access to some of our undergraduate systems and services, as well as some additional services, under GDPR legal basis 6(1)(b) “necessary for the performance of a contract” (the graduate offer agreement you have signed). This data will include your name, UAL email address and contact details, and information will also be created about your attendance at workshops or events, use of our systems, information you provide within events or platforms, advice provided to you by teaching and support staff etc.

As appropriate for the activities you engage in with us under the agreement, your information will be processed on the same systems used for undergraduate student data as described in the [Student Privacy Policy \(https://www.arts.ac.uk/study-at-ual/academic-regulations/student-privacy-policy\)](https://www.arts.ac.uk/study-at-ual/academic-regulations/student-privacy-policy), except for information you provide as part of online interview practice, which will be shared with [Abintegro](#). Your data will be used to support the extended services offered to you and not shared with others or used for other purposes unless required by UK law or as otherwise appropriate under the Data Protection Act 2018.

Your personal data necessary for access and use of these additional services will be retained in line with undergraduate retention periods, i.e. 6 years after your graduation for most records, and permanently for the core student record showing details of your attendance and results. Data held on Abintegro will be deleted by them 6 months after the end of the service they provide. At the end of your extended access, UAL will process your data as described in the [Alumni privacy notice \(https://www.arts.ac.uk/privacy-information\)](https://www.arts.ac.uk/privacy-information) where you can find more information about UAL and your privacy rights
