Rootstein Hopkins Parade Ground  
Chelsea College of Arts

The Rootstein Hopkins Parade Ground is a most extraordinary space, not just because of its vastness – 3500sqm, but also because it is in a unique location; in the centre of London, in the heart of Westminster, adjacent to Tate Britain and the River Thames.

## Dimensions

The RHPG is a 3500 square metres space with an orientation of NNE to SSW.

## Capacities

The maximum capacity is 750, however this is dependent on a number of factors include the nature of the event and use of temporary structures.

## Lighting

A unique LED lit geometric grid defines the space, which for evening events, can be programmed to complement and enhance the activities, illuminating the Parade Ground in sections and sequences to create stunning effects.

Mast street lamps are positioned on the 4 corners of the RHPG with a 3 tiered lamp formation.

## Power

There are a series of pop up power supplies across the RHPG with access to both 16 amp single and 3 phase outlets. Distribution of this can be provided at an additional cost.

## Water

4 water points are located at the corners of the granite set area. Access to rising mains is available for high capacity requirements.

## Fixing Anchors

There is a 5 metre square grid of anchor fixings in the granite set area, equating to 95 in total. Each fixing has a vertical load pull of 350kg.

## Finishes

The ground construction is of flat top granite setts with integral lighting strips flush with the surface. A wide, but variable in width, bonded area surrounds the granite sets. A tree, bench and lighting column are positioned at each corner. The centre comprises of a grassed area 12 metres square.

## Access

Supervised access is via the main gates located on John Islip Street. No vehicle may drive on the granite set area unless an approved portable track system has been laid. No such conditions apply to the bonded gravel areas.
